Java MIDI Player Free Download

Whenever you want to play a MIDI file in your computer and keep it playing, here's a Free Java Application which you can choose as the application of your choice. Free Java MIDI Player is a handy piece of software designed to enable users to play, navigate and shuffle through your favorite MIDI files fast and easy. It also provides control over muting and soloing individual tracks within the MIDI file and a tempo control. Whenever you want to play a MIDI file in your computer and keep it playing, here's a Free Java Application which you can choose as the application of your choice. License: Free to Try(Freeware) and Standard License Language: C++, Java, C#, Linux, Microsoft.NET Downloads: Freeware: 100+ Downloads System Requirements: Windows 2000/XP/Vista/7/8 Paid: No Source code: Freeware: Yes File Type: Binary: Yes Search in files: Binary: Yes MIDI file support: Audio MIDI File formats:.aiff.mid.midi Microsoft.wav.wma and other extensions * If you use VST Files or VST Instrument files from VST Plugin Format (*.vst) then you have to rename your files to.vst! What's in this version: Version 1.9.3: * Fixed a bug with the "Timestamp" fied in the New Song Properties window. Version 1.9.2: * The WAV and AIF files from the Open Target File dialog have got a view window which contains the name of the current song or the total number of songs in the MIDI file. This view is possible only if the "Close file's view before playing MIDI" option is on the Options tab in the New Song Properties window. * The "Mute" button of the Piano Roll has got a new function: it can be used to mute all notes that are currently played in the Piano roll or just to the selection of the playing range in the Piano Roll. * Changed the interface in the "Help" button. The menu entry "File Info" has been removed. * The "Duration (s)" field on the Song Properties window has changed its design. * The "Crop columns

What's New in the Java MIDI Player?
